

Session Program

Jul 7 - 11, 2025

Detection and Dynamics of Exoplanets (DDE): Interplay between theory and observations

Exomoons, exorings, and trojan systems

Physics Department, University of Coimbra, Auditorium C.1
Rua Larga, 3004-516 Coimbra, Portugal

Tue, July 8

9:00 AM

Exomoons, exorings, and trojan systems

Session |

Location: Physics Department, University of Coimbra, Auditorium C.1, Rua Larga, 3004-516 Coimbra, Portugal

9:00 - 9:30 AM

Exomoons, exorings, and other exotica

Speaker

David Kipping

9:30 - 9:45 AM

Looking closer at PDS 70: tracing trojan dust?

Speaker

Olga Balsalobre-Ruza

9:45 - 10:00 AM

Large transiting exoring systems from the ASAS-SN survey

Speaker

Matthew Kenworthy

10:00 - 10:15 AM

Astrometric exomoon detection with VLT/GRAVITY+ and future facilities

Speaker

Thomas Winterhalder

10:15 AM

10:45 AM

Exomoons, exorings, and trojan systems

Session |

Location: Physics Department, University of Coimbra, Auditorium C.1, Rua Larga, 3004-516 Coimbra, Portugal

10:45 - 11:00 AM

On the Detectability of Exomoons by Roman Galactic Bulge Time Domain Survey

Speaker

Ing-Guey Jiang

11:00 - 11:15 AM

The search for (Giant) Exorings and a Short Period Circumsecondary Disk Candidate in Orion

Speaker

Niamh Mallaghan

11:15 AM
