

Automatic Nelson-Barr from Gauged Flavor

Thursday 30 June 2022 18:00 (15 minutes)

Despite exceptional appeal of the Peccei-Quinn mechanism, alternative solutions to the strong CP problem should be pursued. In this direction and given the tight connection of the strong CP problem with flavor, we explore how a Nelson-Barr mechanism (NB) arises automatically in the context of gauged flavor models and solves some of the issues of usual NB realizations.
