

Session Program

19-20 Dec 2022

XV Black Holes Workshop

Session 4 B

ISCTE - University Institute of Lisbon

Monday 19 December

16:30

Session 4 B: chaired by C. Herdeiro

Session | Location: ISCTE-IUL, Auditório B2.03

16:30-16:45

M. Minamitsuji: General relativistic solutions in the Minimal Theory of Bigravity

16:45-17:00

J. Gigante Valcarcel: New black hole solutions with a dynamical traceless nonmetricity tensor in Metric-Affine Gravity

17:00-17:15

R. Garattini: Yukawa Casimir wormholes

17:15-17:30

M. Brito: Stable excited scalar boson-stars and astrophysical consequences

17:30-17:45

A. Pombo: Virial identities in relativistic gravity

17:45-18:00

A. Rincón: The effects of running gravitational coupling on three dimensional black holes

18:00
