

Fermi

Gamma-ray Space Telescope

Toward a Unified Model for GRB Prompt Emission;

Are GRB Standard Candles?

Sylvain Guiriec

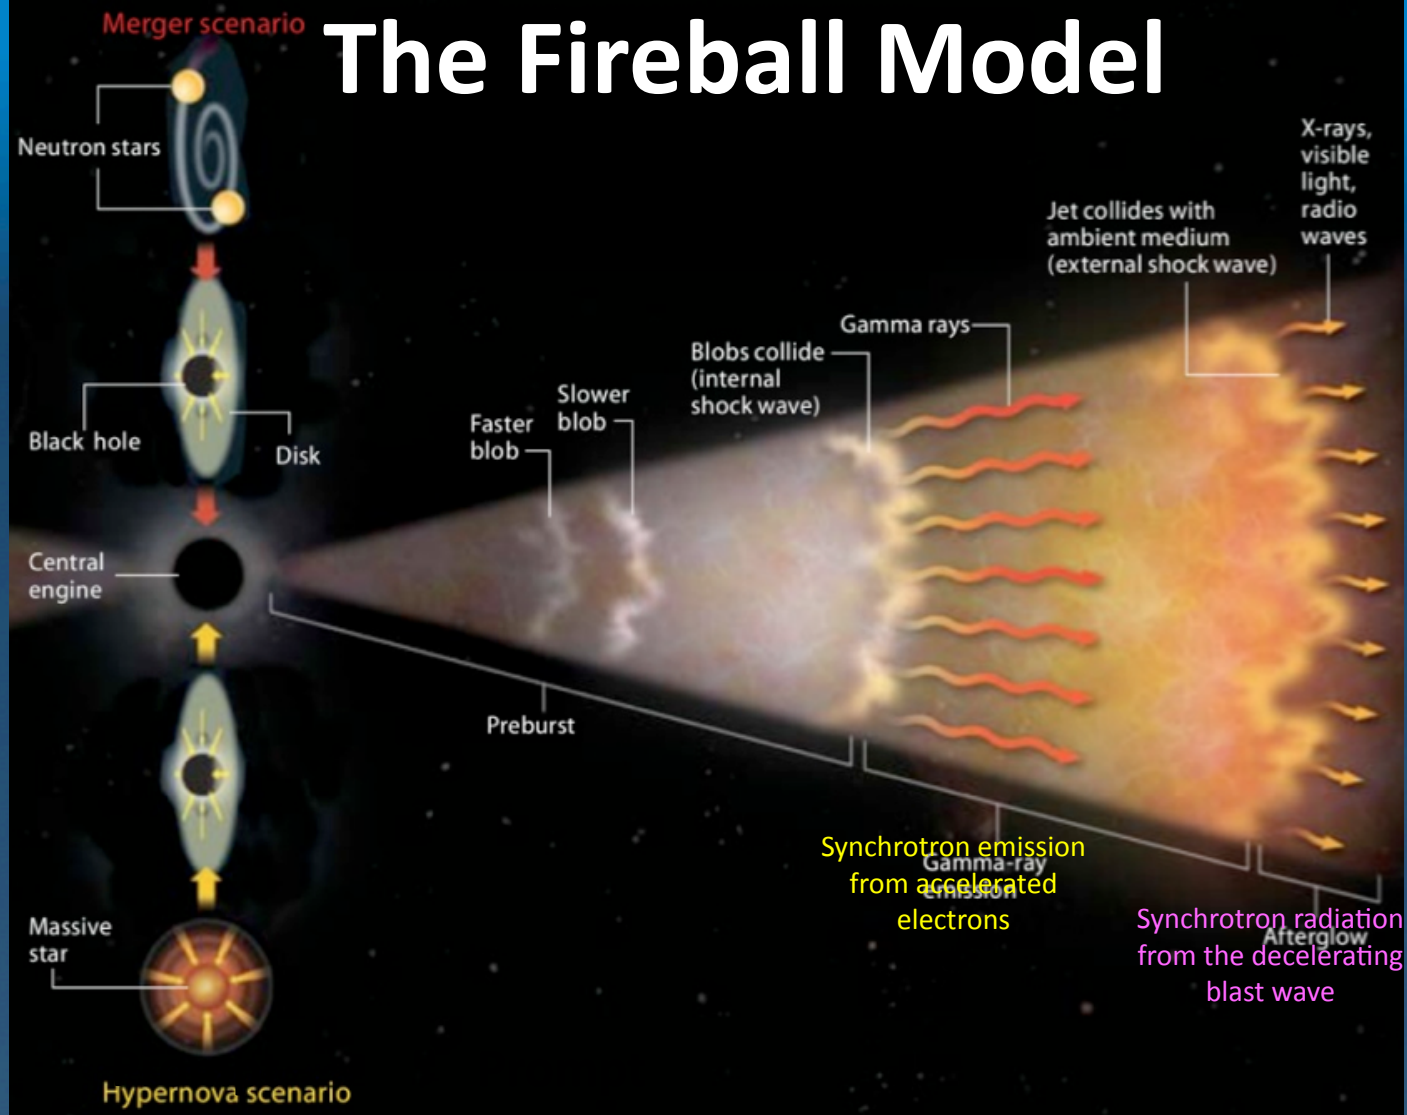

(NASA GSFC/UMD/CRESST)

on behalf of

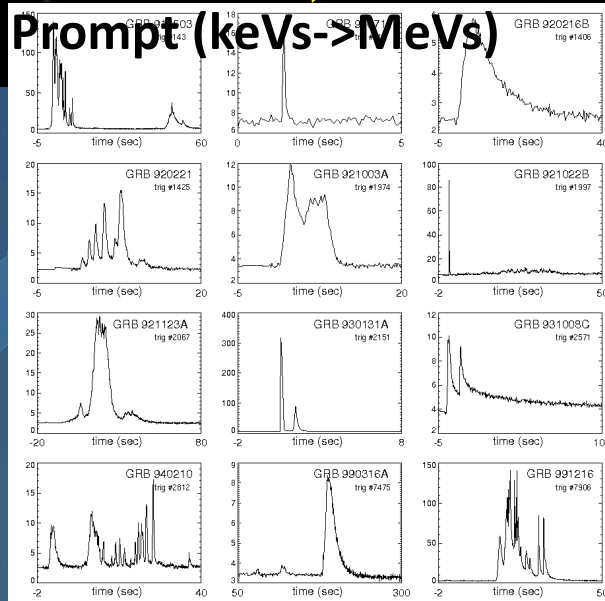

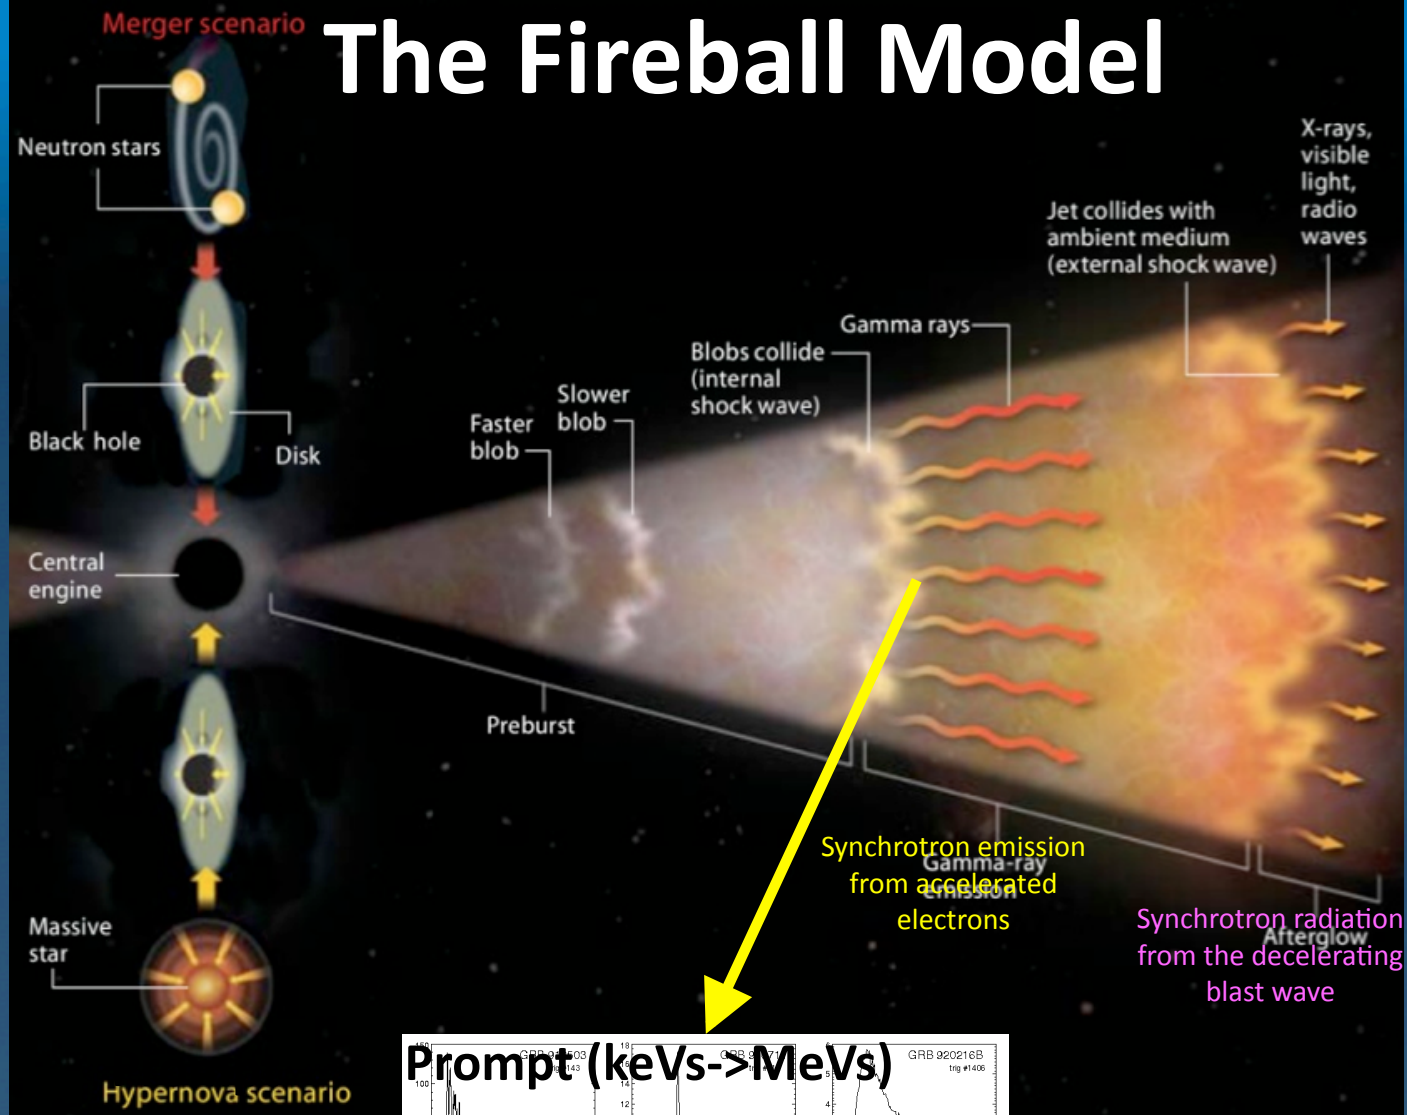

C. Kouveliotou, D. Hartmann, J. Granot, K. Asano, P. Meszaros, R. Mochkovitch, F. Daigne, T. Piran, N. Gehrels & J. McEnery, ...

A New GRB Prompt Emission Model with Fermi

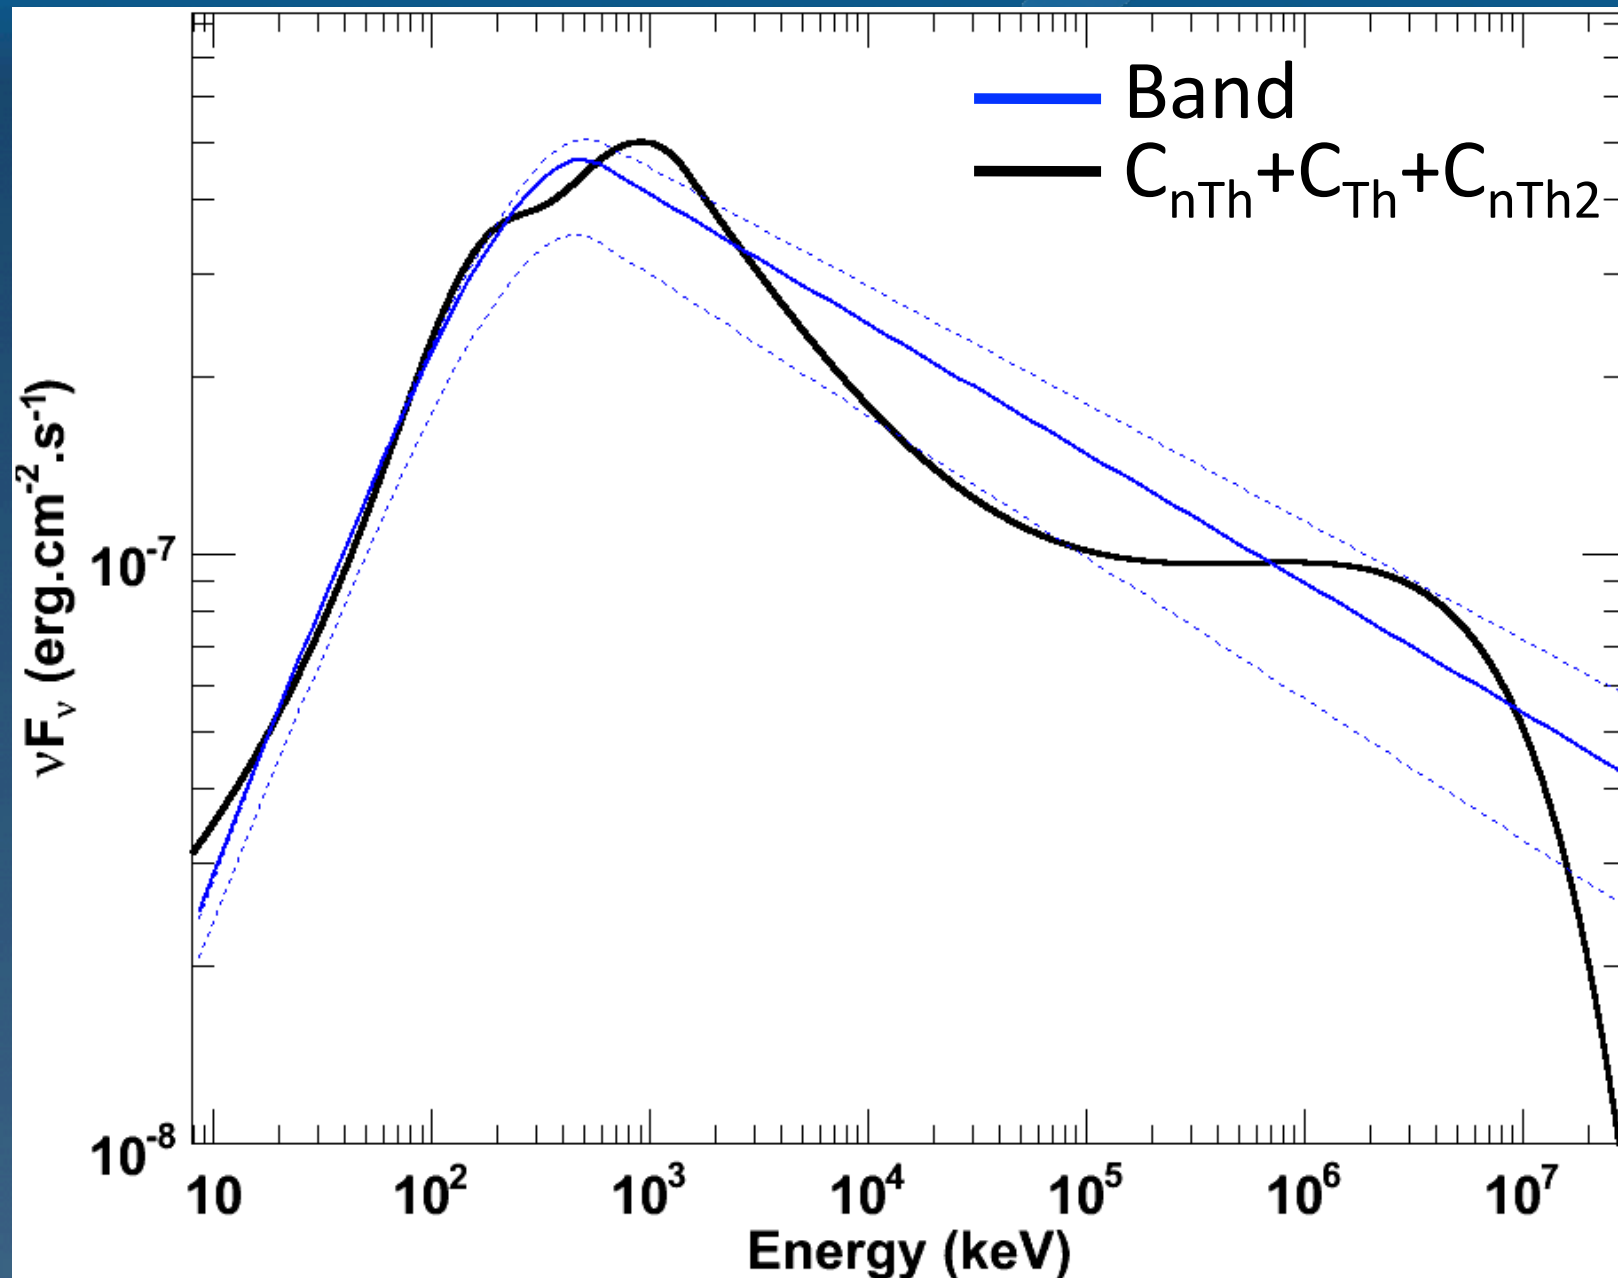

(Guiriec et al., 2010, 2011, 2013, 2015a,b,c)

- C_{Th} : thermal-like emission from the jet photosphere.
- C_{nTh} : non-thermal emission from internal shocks or strongly reprocessed photosphere.
- C_{nTh2} : non-thermal emission from magnetic reconnections.

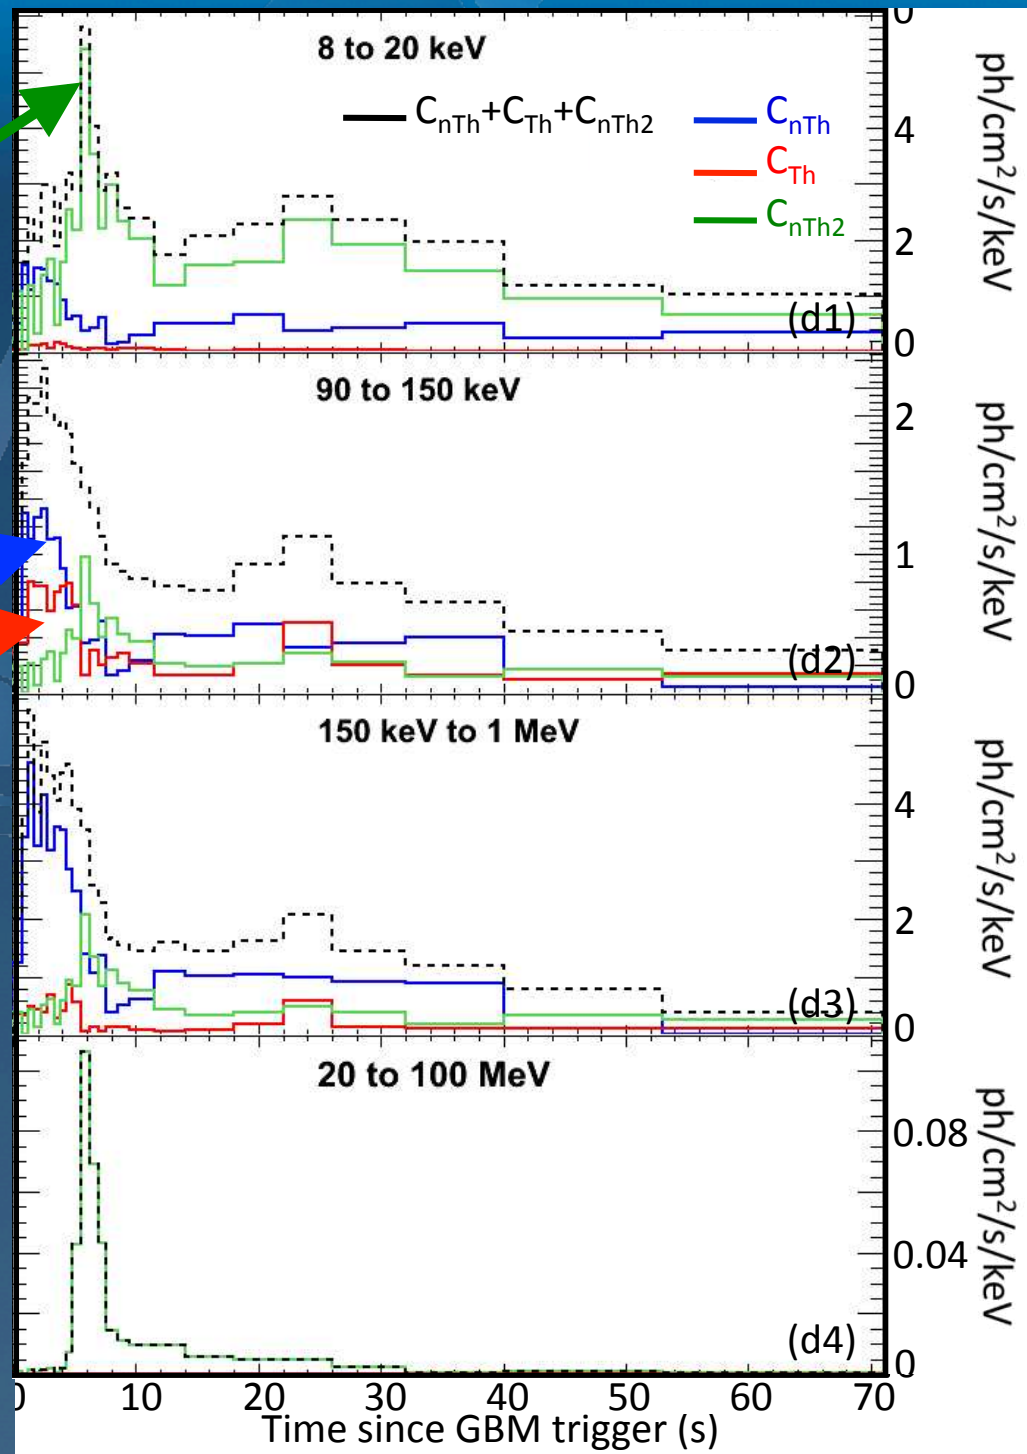

Fermi GRB 090926A

Band vs $C_{nTh} + C_{Th} + C_{nTh2}$

Spectro-Temporal Evolution with $C_{nTh} + C_{Th} + C_{nTh2}$

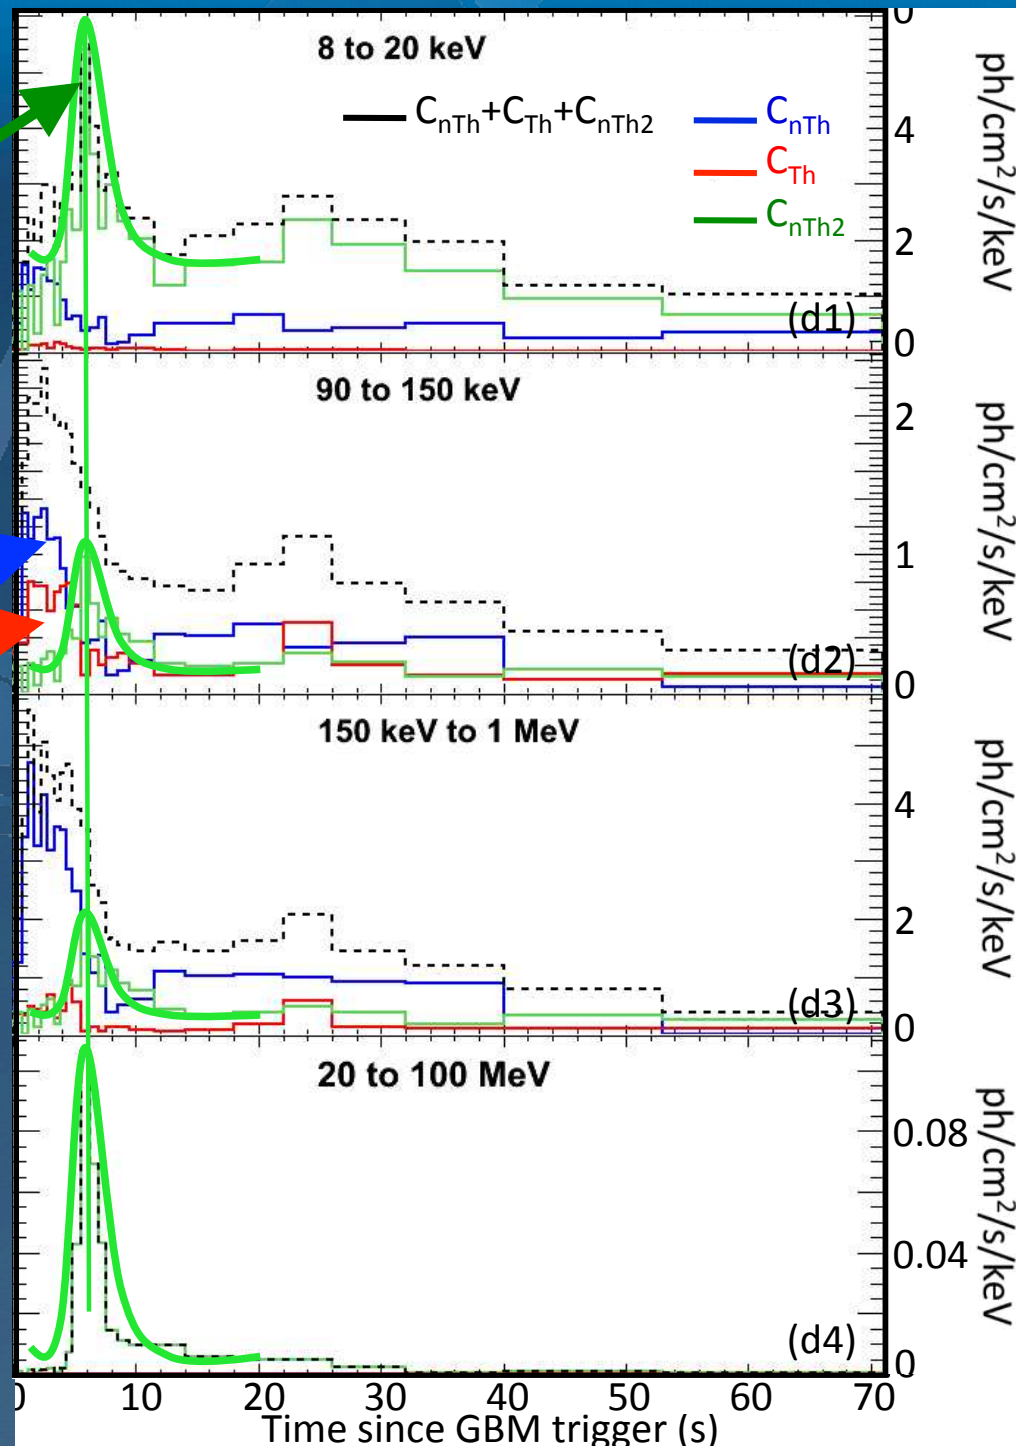

C_{Th} : thermal-like emission from the jet photosphere.

C_{nTh} : non-thermal emission from internal shocks or strongly reprocessed photosphere.

C_{nTh2} : non-thermal emission from magnetic reconnections.

Spectro-Temporal Evolution with $C_{nTh} + C_{Th} + C_{nTh2}$

C_{Th} : thermal-like emission from the jet photosphere.

C_{nTh} : non-thermal emission from internal shocks or strongly reprocessed photosphere.

C_{nTh2} : non-thermal emission from magnetic reconnections.

A Strong Correlation: the $L_i^{nTh} - E_{peak,i}^{nTh,rest}$ Relation

A Strong Correlation: the $L_i^{n\text{Th}} - E_{\text{peak},i}^{n\text{Th,rest}}$ Relation

(Guiriec et al., 2013, 2015a,b,c)

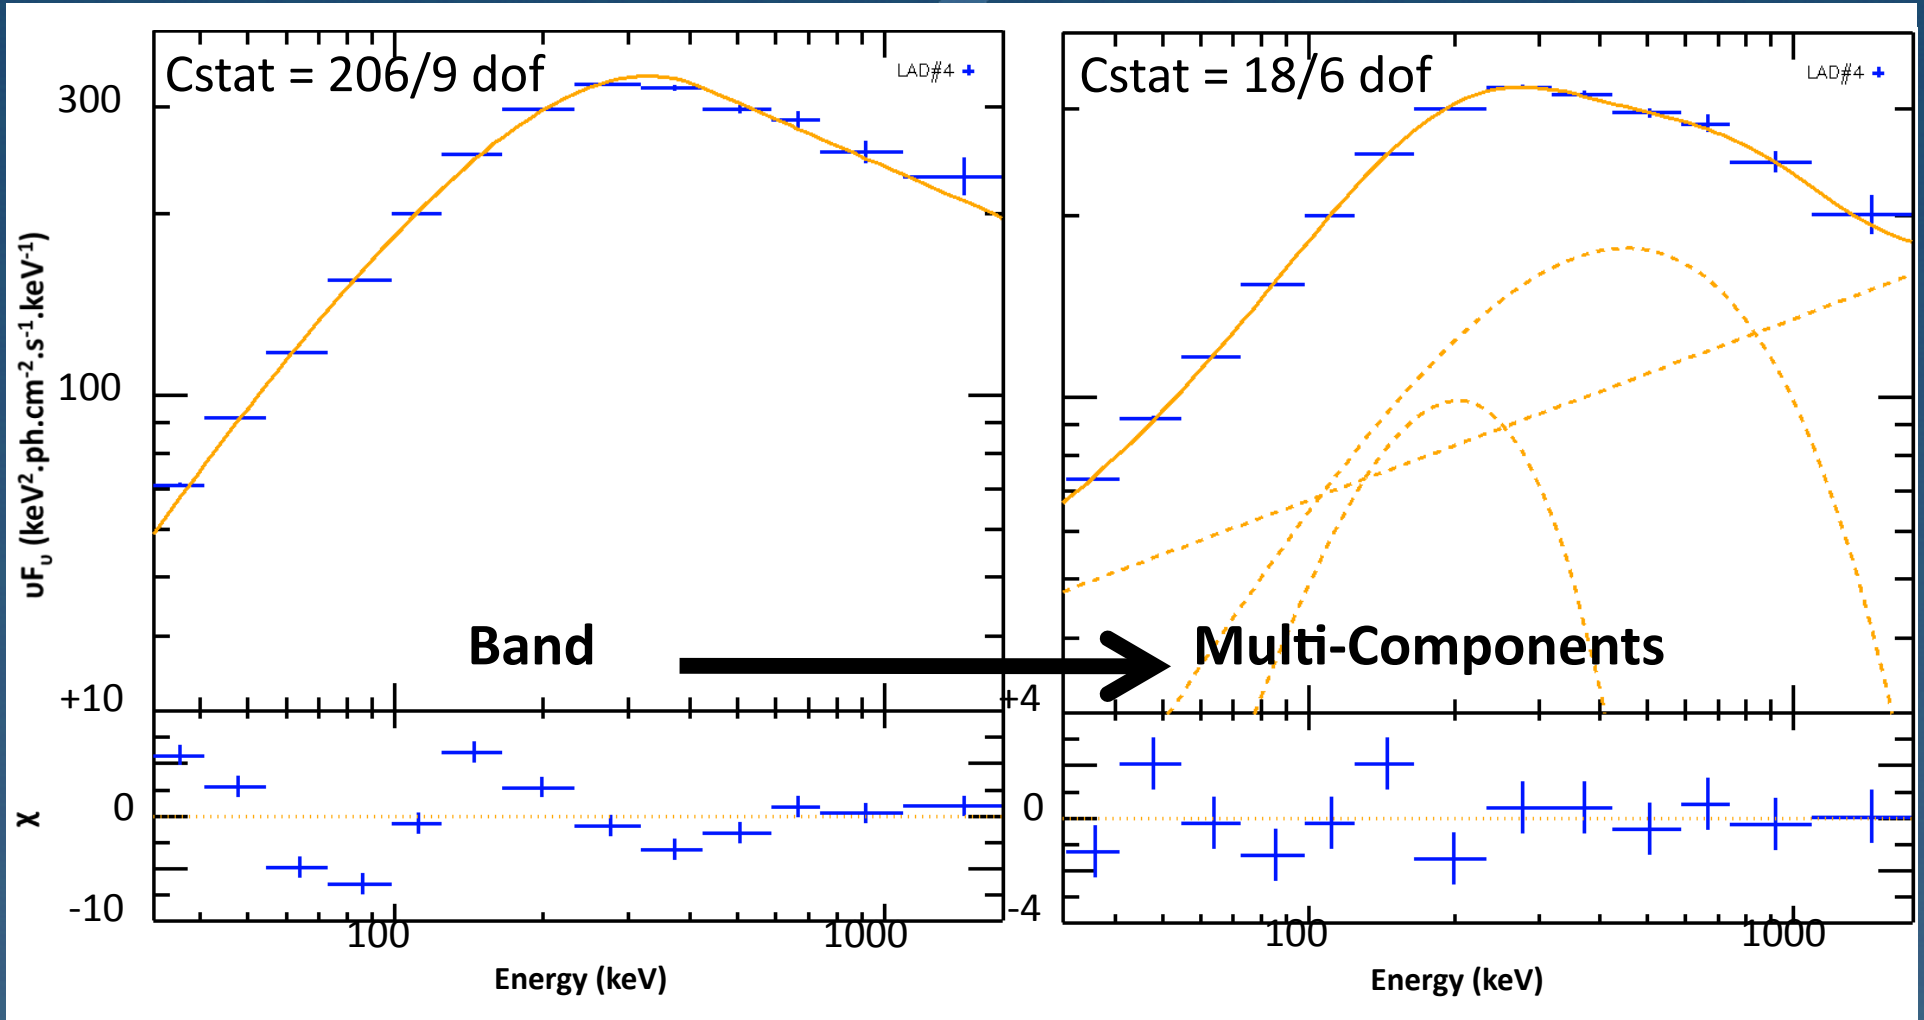

A Strong Correlation: the $L_i^{nTh} - E_{peak,i}^{nTh,rest}$ Relation

Does Only Fermi Capture Those Components ?

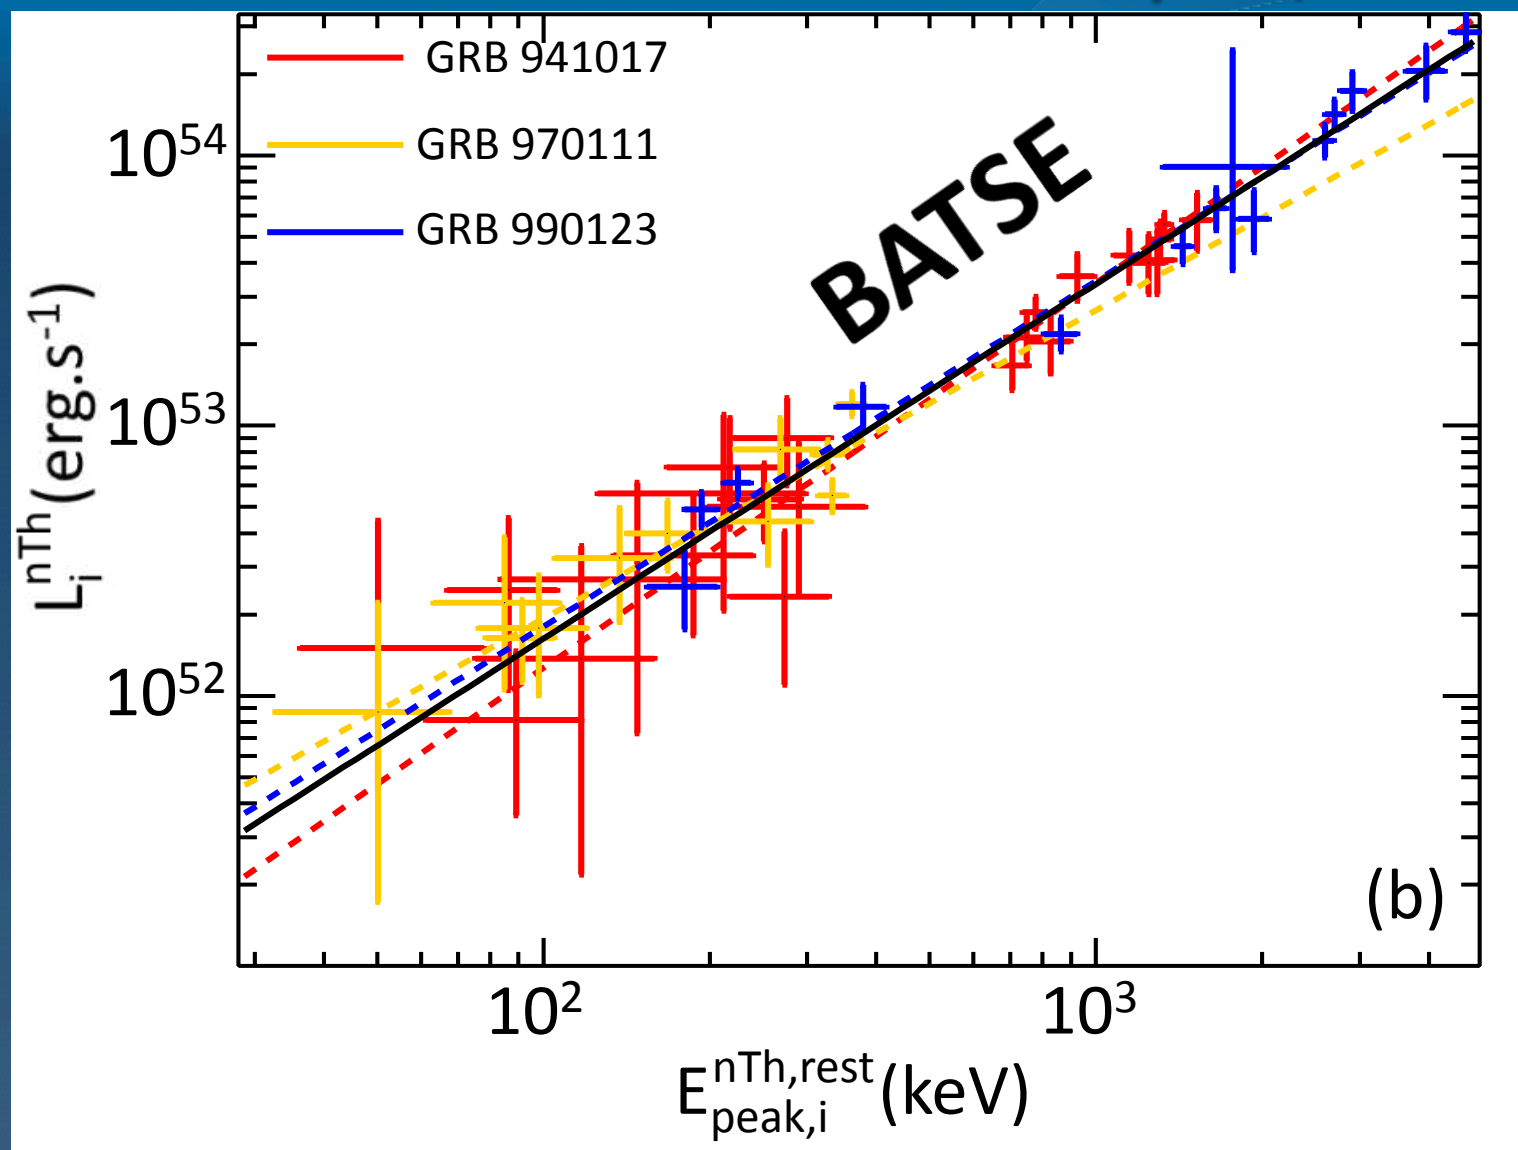

BATSE GRB 941017

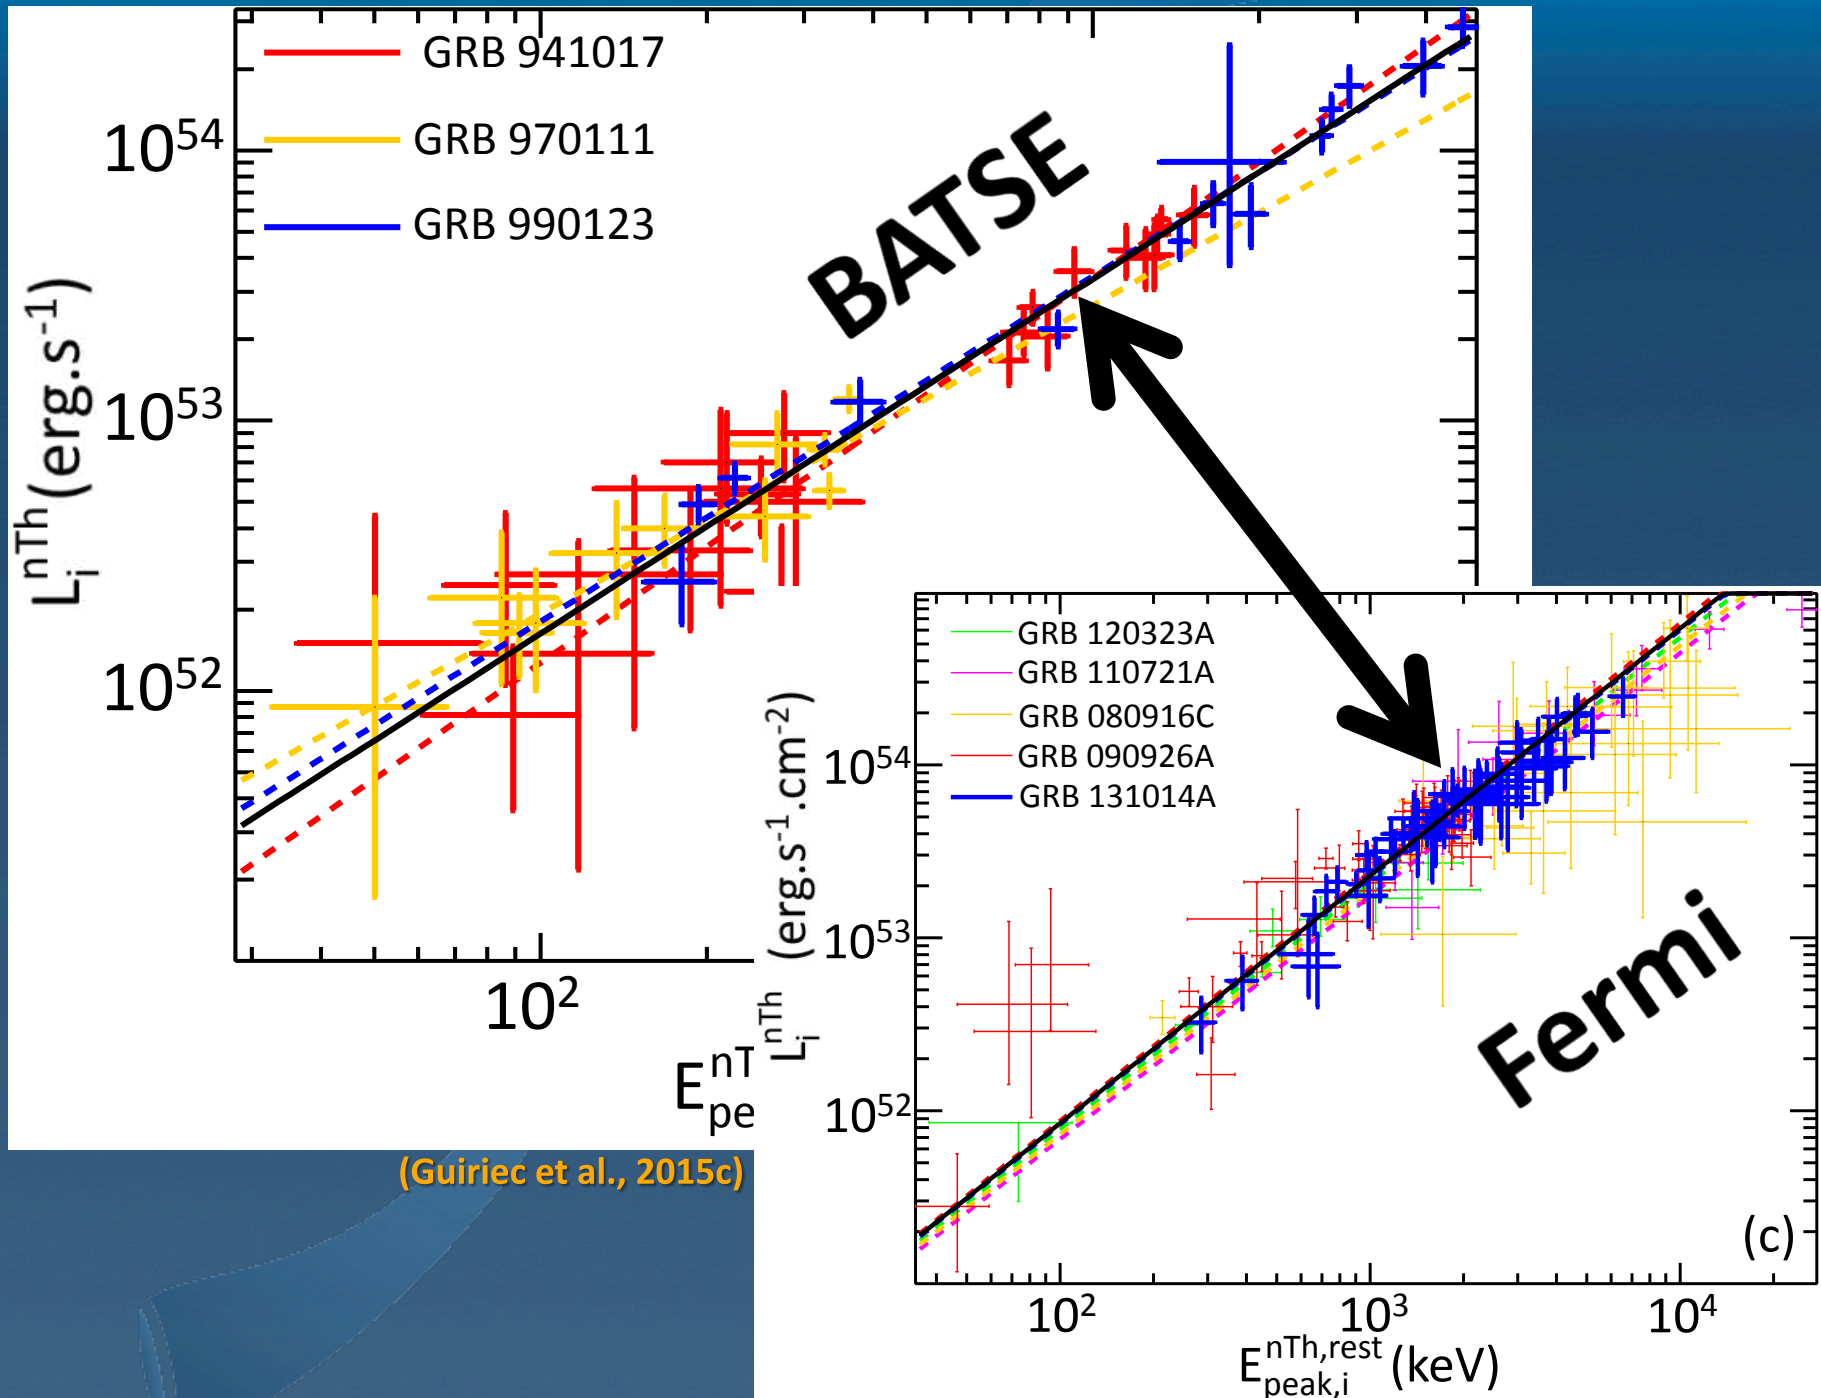

(Guiriec et al., 2015c)

A Strong Correlation: the $L_i^{nTh} - E_{peak,i}^{nTh,rest}$ Relation
